

FOR IMMEDIATE RELEASE

Xllerate Consulting - Innovative Excel Add-in Launched via the Web

GARLAND, TX (March 08, 2009) – Xllerate Consulting, LLC rebranded and launched its newest website, www.xllerate.com, in March 2009 to introduce its innovative Microsoft Excel-based add-in that allows users to transform repetitive tasks into automated procedures. Xllerate® is redefining the market with a comprehensive, affordable solution that allows ordinary Excel users to recover lost productivity.

Xllerate® is the brainchild of founder Maria Grieser, an executive with a broad background in custom software development and 20+ years in management, planning, financial reporting and quality control. Tired of working 80 hours a week filled with repetitive tasks, Maria was determined to find a solution to address the problem of increasing workloads and decreasing resources. After months of searching for a solution, Maria recognized a void in the marketplace and developed Xllerate®. A user-friendly Personal Automation Tool™, Xllerate® delivers immediate results for increased efficiency, accuracy and profitability. Virtually any task performed in Excel can be automated with Xllerate®. Empowering users to benefit from macros without actually knowing how to program is a key feature that makes this product unique.

“Xllerate seems to be exactly what is needed by those of us who are not programmers but would like to benefit from writing VB.”

-- Procurement Division of a leading Distributor of Office Equipment and Document Management Services

Now that the new website has launched, “I am pleased to offer the same solution that brought back balance between my work and personal life to other Excel users in any industry” (financial, manufacturing, medical, technology, etc.), said Maria.

Xllerate Consulting’s website offers a free 30-day trial with a fully illustrated, context sensitive help manual. The website also features free on-line training consisting of an audio/video library, sample programs and templates (www.xllerate.com). Additional services include consulting and customized on-site training programs. Xllerate® requires Excel 2002 or higher and Windows NT or higher.
